

Matt Lehman

Vice President

Professional Experience

During his 8-year brokerage career, Matt has completed over 2.5 million square feet of lease and sale transactions with an aggregate value exceeding \$500 million. He has predominantly represented occupiers in the technology and life sciences industries across office, industrial and R&D product types. His experience ranges from completing local assignments in the San Francisco Bay Area to portfolio-wide account management for major corporations.

Matt recently joined the Cresa Team and diligently educated himself on the account he was about to assume. Matt quickly brought himself up to speed by carefully examining lease abstracts and activity reports, all while developing a relationship with our team and the client's. This ability to jump into an existing account and its ongoing projects is a testament to his diligence, interpersonal skills and attention to detail.
