

Tim King Jr.

Advisor, Project Management Omaha

Professional Experience

Prior to joining Cresa, Tim spent over 11 years in the metal building industry, with 7 years as an engineering technician and 4 years dedicated to product development and process improvement. In his product development and process improvement roles, he would investigate processes and products that would improve business continuity and growth. Most recently, Tim spent 4 years as a residential estimator, bidding components for new construction projects. Tim's work background in drafting, construction, and estimating make him a great addition to Omaha's Project Management team.
