

# Meriem Rahmaoui

Advisor

Paris, France

## Professional Experience

Prior to joining Cresa, Meriem worked as a corporate consultant and project manager on domestic and international real estate projects. She uses this knowledge to assist clients in researching practical solutions that meet their business and operational needs.

Meriem's experience includes master planning for international companies, portfolio management, strategic implementation of new real estate tools and project management assignments where she is responsible for assisting clients and leading team coordination, planning and methodology tasks.

Cresa France assisted Coty in managing the project development of our new offices, research laboratory and training center at the Metropolitan (6,500 sqm in Paris) from the strategic framing of the project to the snagging list finalisation. Combining strong technical expertise and communication skills, the Cresa team has been able to engage the various partners, both internal and external, thus enabling the achievement of binding time and budget objectives. I can only recommend working with Cresa France!

Alexandrine Ripaud Boucherat, Real Estate Director  
Coty
