

Isaac Lane

Assistant Project Manager
Phoenix

Professional Experience

In his role at Cresa, Isaac interacts with contractors, architects, vendors, landlords, and occupiers and supports the project management team with all aspects of the project management cycle. Isaac has previous experience with working on construction projects and managing vendors/contracts in delivering a final product on time and within budget. As a deployment engineer, he managed and deployed multi-million-dollar projects that delivered Amazon's leading-edge robotics technology in its fulfillment, transportation, and delivery network. During these projects he managed contractor relationships while actively finding opportunities to reduce cycle time, cut costs, and enhance delivery of products.

Education

Isaac received his undergraduate degree in mechanical engineering and recently graduated with an MBA from Valparaiso University with a concentration in engineering management. While at Valparaiso, Isaac was a division 1 student athlete playing on the Valparaiso football team and treasurer of the National Society of Black Engineers.
