

The Coca-Cola Company Brussels, Belgium

Dennis Compton, Project Management

Combining Three Offices and Relocating
its European Technical Assurance Group

Client Objectives

Combine offices from three separate locations throughout metropolitan Brussels and relocate the European Technical Quality Assurance Group from Essen, Germany to a new campus location in Southwest Brussels. The building site was once a bottling facility that included environmental remediation prior to the construction of the new office campus.

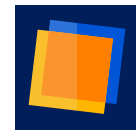

Space

500,000 SF

Results

Successfully completed construction of a 500,000 SF facility to house the Belgian headquarters of The Coca-Cola Company, Coca-Cola Enterprises, and the European Technical Quality Assurance Group. The technical group required a 75,000 SF lab facility to provide soft drink quality analysis for Europe and Africa. Campus facilities include a cafeteria, medical facility, credit union, and health club. The facility was completed in 2002.
